

Automotive: (Solvent: HA)

These series are suitable for special application such as automotive, airplane, coil, etc. Advanced equipment has been used to manufacture these special grades. The particles are narrowly distributed silver-dollar like with smooth edge and surface. Therefore, prepared coatings possess high reflectivity with bright appearance and smooth look.

Aluminum Paste:

| Grades | Average Particle Size (D50) (μm) | Non Volatile Content ($\pm 2\%$) | Screen Analysis (325 mesh < %) | Applications |
|--------|---|------------------------------------|--------------------------------|------------------------------|
| A 07 | 7 | 70 | 0.5 | OEM, Refinish, Coil, Plastic |
| A 09-1 | 9 | 70 | 1.0 | |
| A 09-2 | 9 | 72 | 1.0 | |
| A 10 | 10 | 72 | 1.0 | |
| A 12 | 12 | 72 | 1.0 | |

Properties reported here are typical of average lots. Saminfam co. makes no representation that the material in any particular shipment will conform exactly to the values given.
