

Samin Fam Tejarat Co.

Chrome effect: (Solvent: HA)

Chrome effect series possess excellent leafing stability with great sparkling effect. Special willing process and surface treatment for narrowly distributed spherical particles bring specular chrome effect for film.

| Grades | Average Particle Size (μm) (D50) | Non Volatile Content ($\pm 2\%$) | Screen Analysis (325 mesh < %) | Applications |
|--------|---|------------------------------------|--------------------------------|--|
| Ch 13 | 13 | 72 | 1.0 | Nail Polish, Decorative, Ink, Bicycle, Headlamp Reflector, Aerosol |
| Ch 10 | 10 | 70 | 1.0 | |
| Ch 07 | 7 | 70 | 1.0 | |
| Ch 04 | 4 | 70 | 1.0 | |

Properties reported here are typical of average lots. Saminfam co. makes no representation that the material in any particular shipment will conform exactly to the values given.
