

Masterbatch

These series are suitable for production of masterbatch. They could be used in both type of paste and powder and they are compatible with almost every polymers.

Aluminium Paste: (Solvent: HA)

Grades	Leafing Value min (%)	Non Volatile Content ($\pm 2\%$)	Screen Analysis (325 mesh < %)	Water Coverage min ($\text{cm}^2/\text{g} \pm 10\%$)
L 75	75	65	1.0	24000
L 80	80	65	1.0	17000
L 85	85	65	1.0	20000

Aluminium Powder:

Grades	Leafing Value min (%)	Non Volatile Content ($\pm 2\%$)	Screen Analysis (45 μm > %)	Water Covering min ($\text{cm}^2/\text{g} \pm 10\%$)
LP 65	65	99.5	99	7500

Properties reported here are typical of average lots. Saminfam co. makes no representation that the material in any particular shipment will conform exactly to the values given.
